

HomesToLife Singapore | 845 Qualified Furniture Leads Generated in 30 Days via Meta Ads

This project focused on generating high-quality leads for a furniture retail and wholesale brand based in Singapore using Meta Ads. We developed and tested multiple creative formats including short-form reels, lifestyle imagery, and static offer-driven ads to identify what resonated best with high-intent buyers.

Through continuous optimization and close metric tracking, the campaign achieved:

- **845 qualified leads**
- **11,159 link clicks**
- **7% lead conversion rate**
- **3.99% average hook rate across ad sets**

This campaign highlights how structured creative testing, performance-based optimization, and disciplined metric monitoring can consistently drive scalable, high-quality leads for furniture businesses without compromising lead quality.
